Army e-Learning

“Keeping the Army ahead of the IT curve with technology training for the future.”

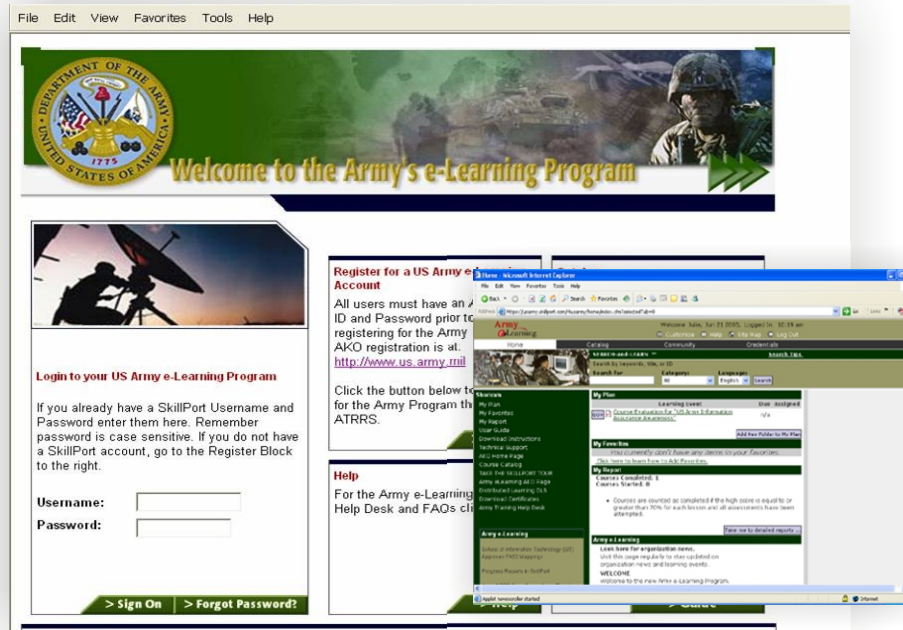

Army e-Learning has become the Army's primary means of satisfying initial and recurring IT training across the entire spectrum of individual and organizational requirements. The Army e-Learning program offers 2,000 information technology, business, foreign language, leadership and interpersonal skills courses to all active duty Army, National Guard, Reserves, and DA civilians. Courses are free to the individuals and their organizations. To date over 213,000 students have enrolled!

The e-Learning Environment

The e-learning environment provides students with an entire range of effective learning through:

- ✦ State-of-the-art courses
- ✦ On-line subject matter experts and mentors available 24/7
- ✦ On-line meeting rooms, white boards and chat rooms with other students

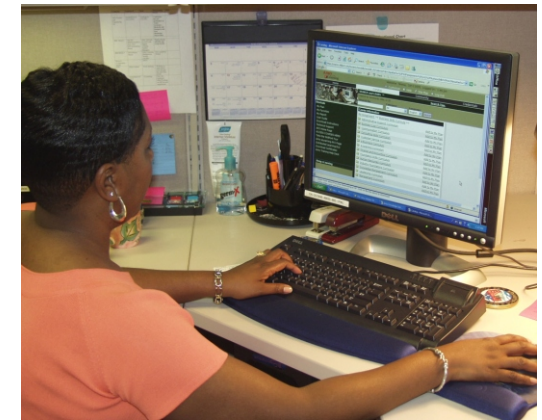

- ✦ A vast technical library of articles, white papers and recorded seminars conducted by the industry's leading experts
- ✦ Management Reports – ATRRS and e-Learning

See what students are saying about their Army e-Learning experiences...

“I have used the Army's e-Learning program since the start. The courses have assisted me in passing both my A+ and Network+ exams. The availability to take classes on-line is a great tool to allow me to keep continuing my education. Thanks for the good work.”

- SSG Bartoszek

As an Army Soldier or DA Civilian you can earn your certificate, advance your career, and achieve your goals, anywhere, anytime!

“Since retiring from active duty and becoming employed as a DA civilian, I have been ‘retraining’ myself. My goals are being met, (thanks to the availability of Army e-Learning training materials) to change career fields and join the Information Technology field. It wouldn't have been possible, or at least less likely, without the availability of these courses. Who says ‘old dogs can't learn new tricks.’”

- Carl Herbert, USMA-BOD-EMB

“Army e-Learning is such a good training system! It gives all federal workers the opportunity to attend/take courses; and even more it is available 24/7 at work and at home. This is great!!! I think this is a pretty good investment.”

- Marcela Alexander

So...What are you waiting for?
